

Top 3 Benefits

SourceDay Offers NetSuite Users on Shipment Visibility

Unparalleled insights with SourceDay's Built-for-NetSuite shipping solutions.

What sets SourceDay apart is its powerful bi-directional integration with NetSuite, which not only retrieves data but also pushes accurate data back into NetSuite. This seamless exchange ensures that you always have the most up-to-date and granular information at your fingertips, helping you to make informed decisions quickly.

Shipping is one of the biggest and most important focuses for any manufacturer. It's the meat of the supply chain sandwich. If you don't get your shipments on time or miss important updates - that leaves your customer waiting. That's why we focus on what's important: improving visibility and communication, which ultimately improves on-time delivery (OTD) and on-time in full (OTIF). See below for insight into where our customers are seeing results and what they're saying.

Outcomes

48%

Improvement in
Supplier OTD

96%

OTD to
Customers

80%

Supplier
Adoption

“ We have more visibility which means we can be very proactive. We've been able to ship earlier more often and recognize revenue faster.”

-Materials Manager

1

Real-Time Visibility and Proactive Decisions

SourceDay allows you to foresee disruptions, make proactive decisions, protect your revenue, and ensure smooth business operations. The 'Ready to Ship' feature notifies buyers when orders are packaged and ready for shipping and allow shipment details to be entered within SourceDay.

2

Automated and Error-Free Inbound Shipments

The NetSuite Inbound Shipments Connector automates the creation of inbound shipment records in NetSuite. By capturing Advanced Shipping Notice (ASN) data, it provides a comprehensive view of inventory ownership and allocations, ensuring the accurate processing of goods and payments.

3

Efficient Drop-Ship Order Management

The Drop Ship Connector for NetSuite Item Fulfillment ensures a seamless connection between NetSuite and SourceDay for managing drop-ship orders. It allows suppliers to enter an ASN for a drop-ship order in SourceDay, which then creates an Item Fulfillment record in NetSuite, empowering real-time revenue recognition in NetSuite.

Are you ready to supercharge your **shipment visibility**?

SourceDay's suite of shipping solutions, integrated with NetSuite, empowers your supply chain operations with real-time visibility, automation, and efficient order management.

Experience proven results, including:

- Improved supplier OTD
- Improved OTD to customers
- No more missed communication on crucial orders

We give your entire team full visibility into every PO line, ultimately allowing you to proactively address challenges, minimize production delays, and drive operational excellence.

Get started today with SourceDay. We promise you won't regret it.
